### **Summary**

I am a Full-Stack Web Developer & Emerging Engineer. I design and develop New experiences, which makes people's lives simple. I'm also a war **Veteran** (Marines), from minority demographics, with 24+ years of various work experiences, which has taught me to build valuable relationships: I love winning people. I have savvy computer knowledge (self-taught, and various courses leading to Certification). I have worked in high demand and stressful environments. I look for problems to solve and I focus on responsive design. I observe new trends, and my inference stems from winning system, "**G. A. M. E.:** **G**ather the Facts, **A**nalyze them, **M**ake a plan; and **E**xecute it, Triumphally- that's how you win a Game!" - F. Thomas, Sr. I'm a critical thinker. Let's change our world, together; and make it better for one another.
